EXCEL PRACTICE

- Open a new Excel Workbook.
- Enter the following information into the data sheet.

Cell	Information to Enter
A1	**First Name**
B1	**Surname**
C1	**English**
D1	**Mathematics**
E1	**Social Studies**
F1	**Science**
G1	**Agriculture**
H1	**Science Integrated**
I1	**Average**
J1	**Grade**

Enter the following information into the sheet

Emily	Phiri	45	60	76	56	75	56		
Daniel	Jere	90	78	98	78	98	78		
Tawako	Kaonga	67	56	76	87	67	67		
Jessie	Kadwa	76	56	67	56	56	78		
Mary	Jeremiah	67	67	87	89	90	97		

- □ Calculate the average mark for each student
- □ Use IF Function to calculate the Grade for each student using the following guide lines

Average	**Grade**
Greater than or equal to 50	Pass
Less than 50	Fail

- □ Calculate the grade again by using different guidelines below

Average	**Grade**
Greater than or equal to 70	A
Between 70 and 60	B
Between 60 and 50	C
Between 50 and 40	D
Below 40	F

- Enter the following information into the data sheet in the right cells.

Cell	Information to Enter
A8	K20,000
A9	K15,000
K1	**Fees**

- □ Use IF function and cell address (A8 or A9) to determine the fees each student will pay according to following guidelines

Grade	Fees
A to D	K15, 000
F	K20, 000

- □ Create a bar chart to show how each student performed in all the subjects (Include Surnames of students and subject names)
