## Create a new database

1. Open Microsoft Access.

It should look like this:

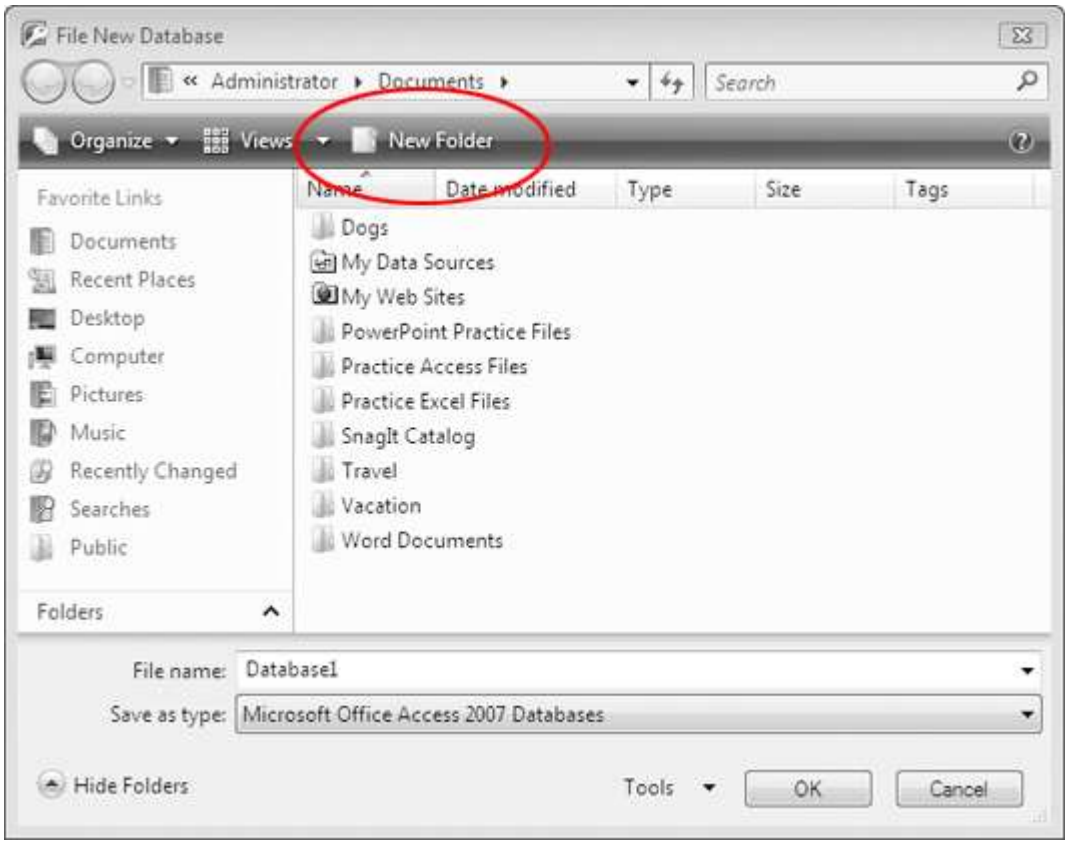

2. Click **Blank Database**.

3. Click the icon.

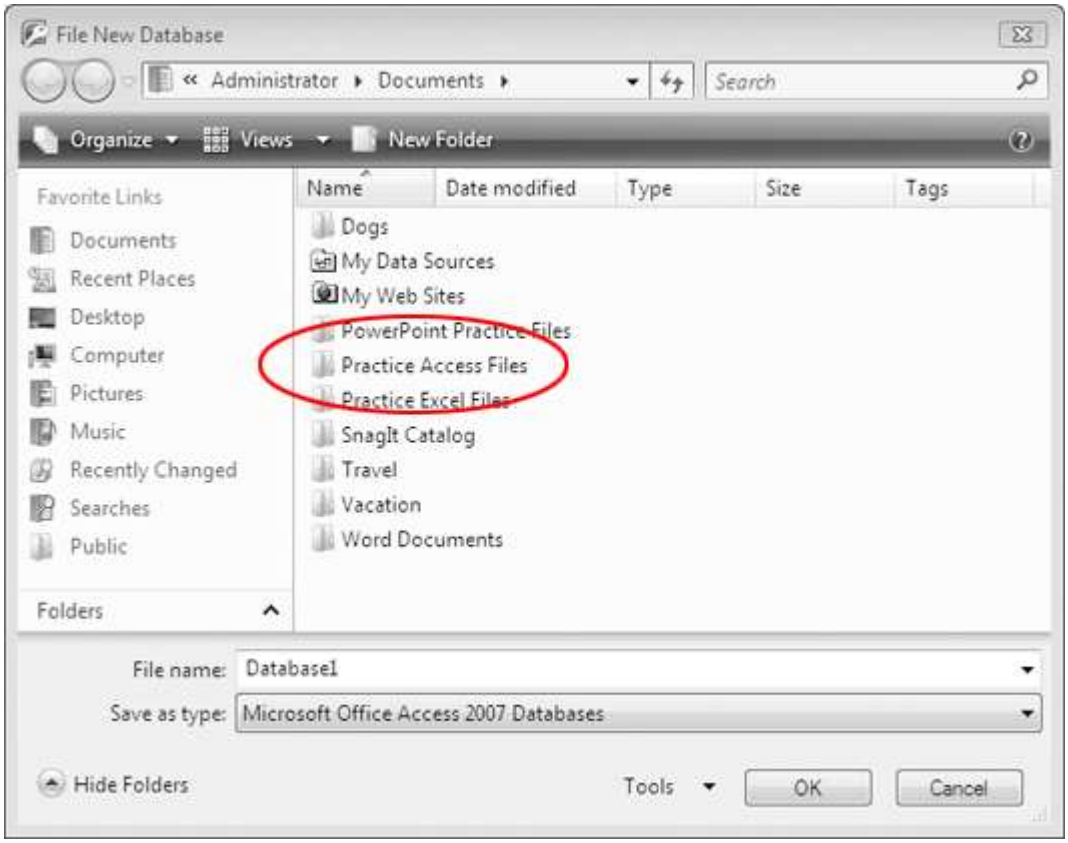

4. When the **File New Database** window appears, click **New Folder**.

5. Type:

   **Practice Access Files**

   Then press the **ENTER** key on your keyboard.

6. In the **File name** box, type:

   **Friends**

7. Click the OK button.
8. Click the Create button.

Guide to Access 2007 User Interface
Organize all your objects using the new, easy access Navigation Pane

The window for the **Friends** database should open:

*Identify database elements*

Elements of databases

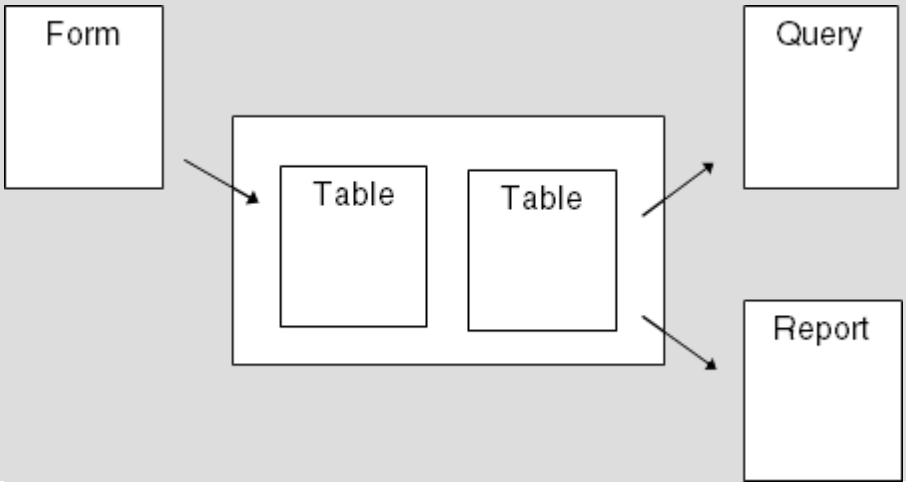

A database stores information in an organized way, and makes it easy to get information in and out.

**Tables** store data within the database.

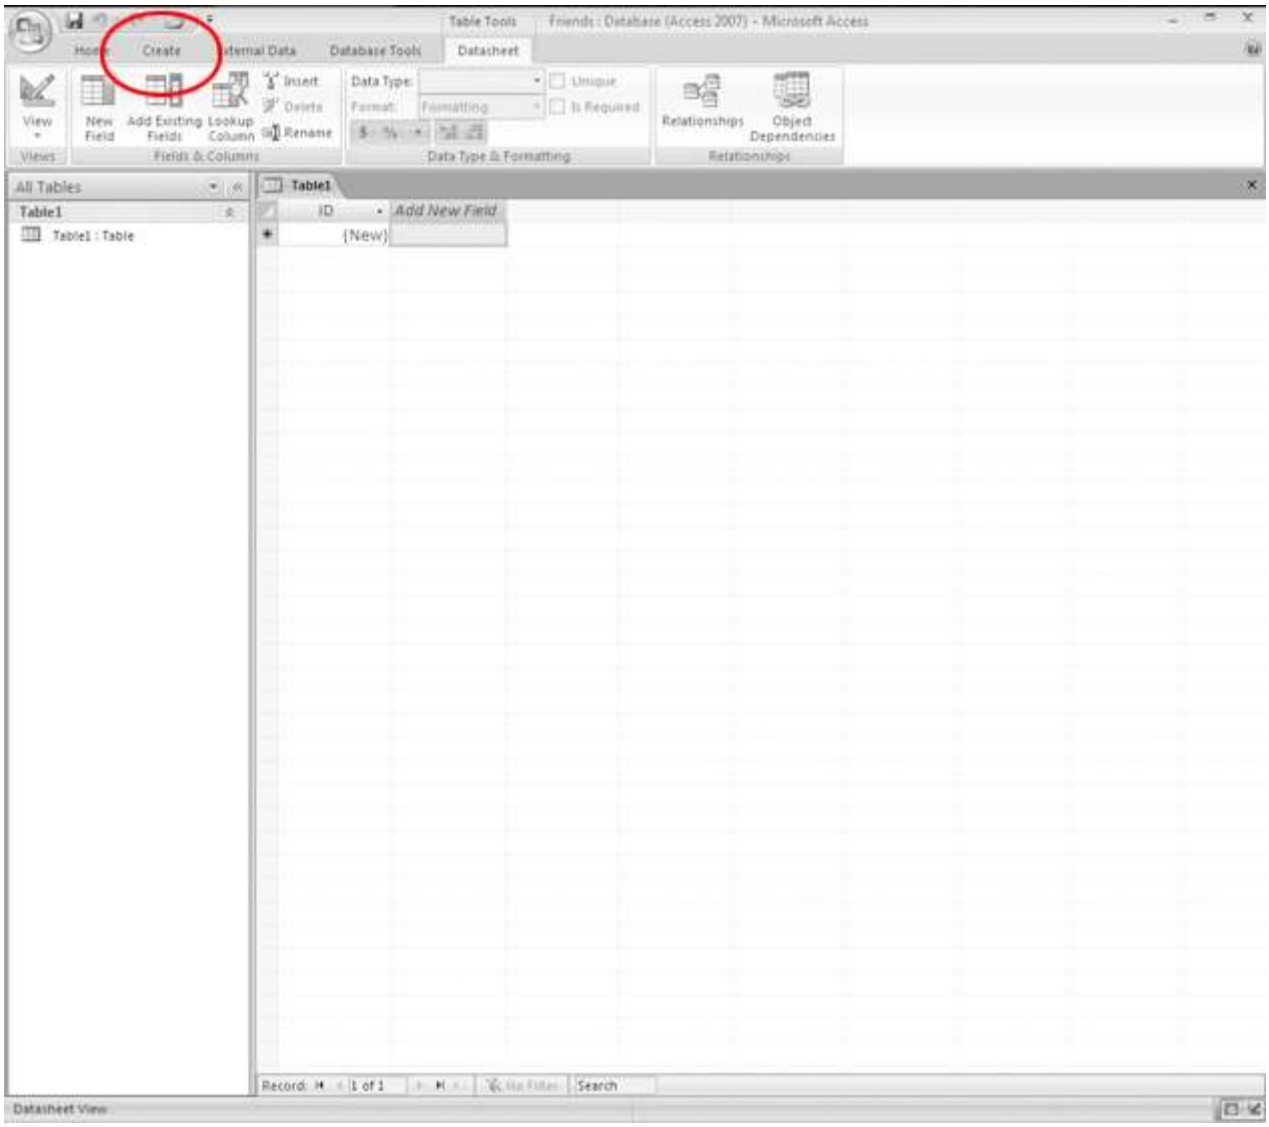

**Forms** make it easy to put data into tables.

**Queries** pull out specific data.

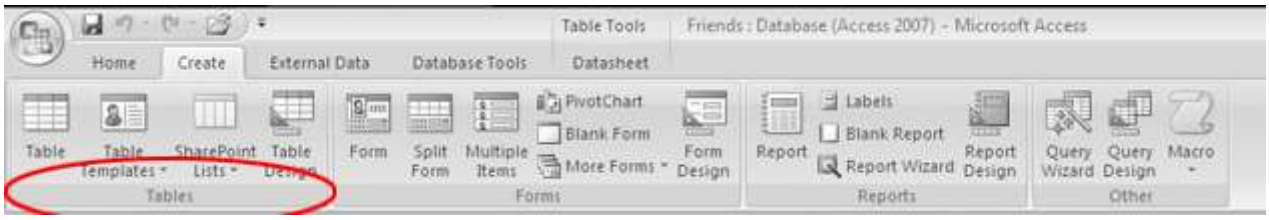

**Reports** put data in an easily-read format.

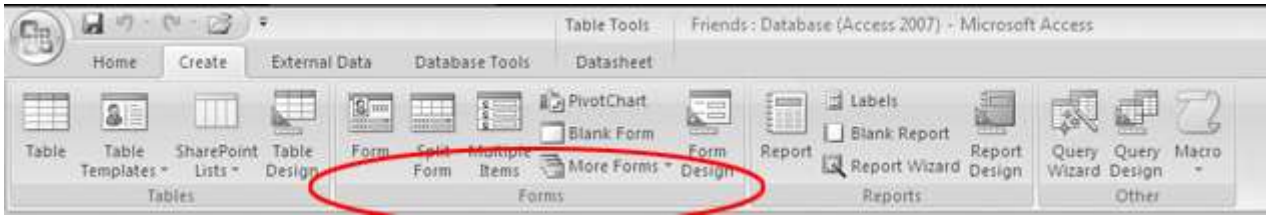

1. Click the **Create** tab.

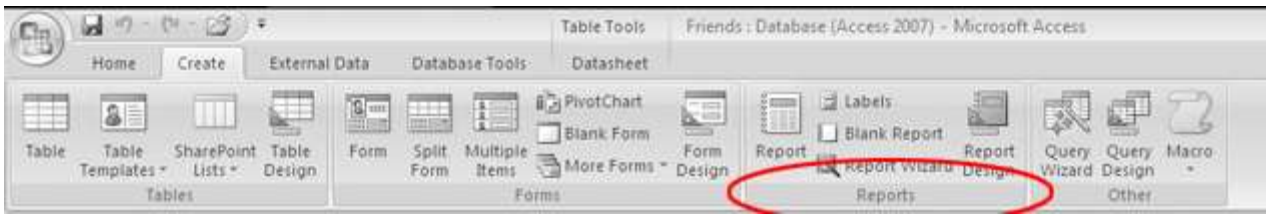

2. Rest the mouse cursor on the **Tables** bar.

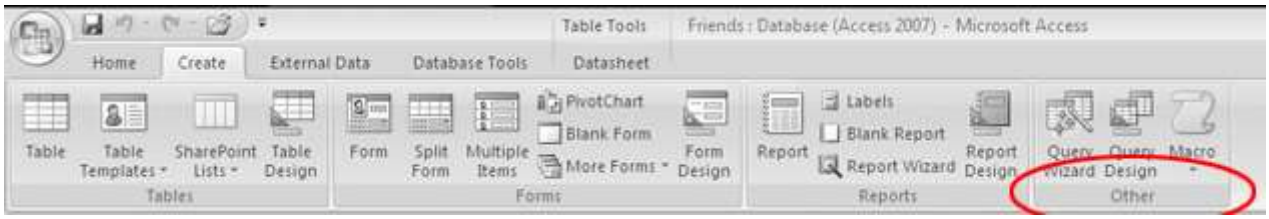

1. Rest the cursor on the **Forms** bar.

2. Rest the cursor on the **Reports** bar.

3. Rest the cursor on the **Other** bar.

CREATE TABLES

1. Click the **Datasheet** tab.

2. In the Ribbon, click **View**.
