C for loops

C for loops is very similar to a while loops in that it continues to process a block of code until a statement becomes false, and everything is defined in a single line. The for loop is also **entry-controlled** loop.

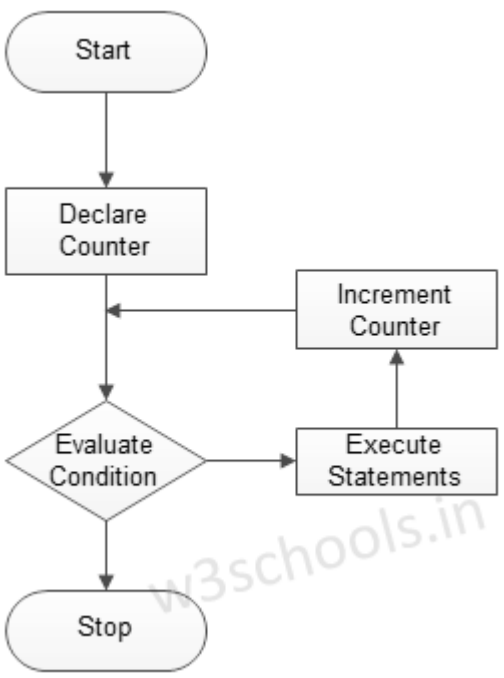

The basic format of for loop statement is:

Syntax:

```
for ( init; condition; increment )
{
   statement(s);
}
```

Valueimpression

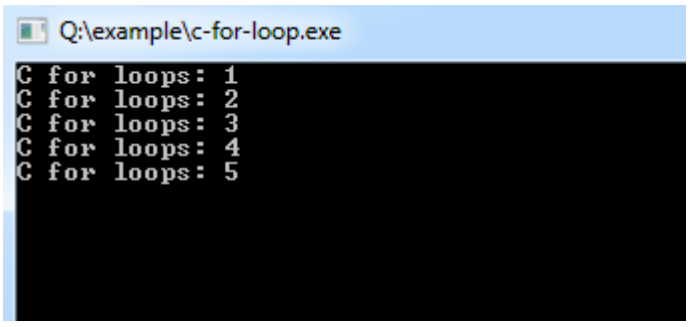

```
#include<stdio.h>

int main ()
{
  /* local variable Initialization */  int n,times=5;;

   /* for loops execution */   for( n = 1; n <= times; n = n + 1 )
   {
      printf("C for loops: %d\n", n);
   }

   return 0;
}
```
