Question 3.

A. After conducting a Vulnerability Scan for one of the servers at CMC Holdings Company using MBSA, you obtained the following scan results;

Microsoft Baseline Security Analyzer

Computer name:	CHIGAMBA\CMC
IP address:	10.10.100.53
Security report name:	CHIGAMBA - CMC (2-1-2018 1-44 PM)
Scan date:	2/1/2018 1:44 PM
Scanned with MBSA version:	2.3.2211.0
Catalog synchronization date:	Security updates scan not performed

Sort Order: Score (worst first)

Windows Scan Results

Administrative Vulnerabilities

Score	Issue	Result
	Local Account Password Test	Some user accounts (2 of 5) have blank or simple passwords, or could not be analyzed. What was scanned Result details How to correct this
	Guest Account	The Guest account is not disabled on this computer. What was scanned How to correct this
	Automatic Updates	The Automatic Updates feature is disabled on this computer. What was scanned How to correct this
	Password Expiration	All user accounts (5) have non-expiring passwords. What was scanned Result details How to correct this

Score	Issue	Result
	Auditing	Neither Logon Success nor Logon Failure auditing are enabled. Enable auditing and turn on auditing for specific events such as logon and logoff. What was scanned How to correct this

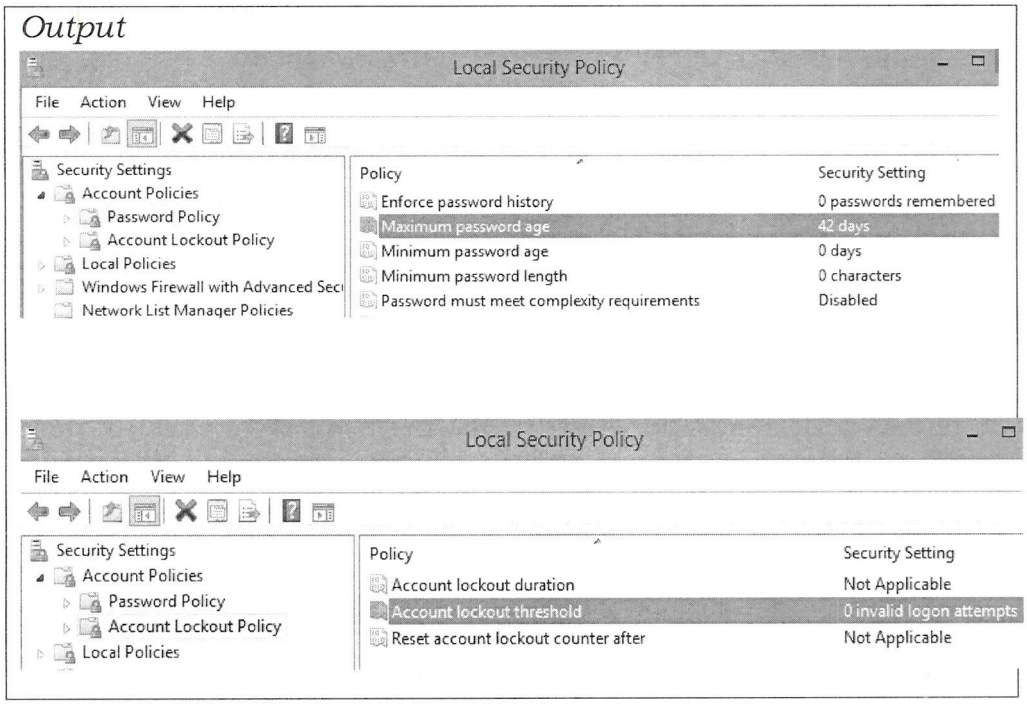

Write a brief report advising Management of the company on user account passwords, guest account and event auditing on this specific server. **(20 Marks)**

B. In strengthening the system security, the password policy of your Organization demands the following controls to be in place;

i. Passwords must be changed every 30 days,
ii. 3 Invalid logon attempts should warrant an account lockout.

Upon reviewing the local security policies of your windows server you get the following displays;

Output

Draft an audit finding on each control as per the password policy above, include the associated risk and provide a recommendation to be presented to the auditees. **(20 Marks)**

Question 4.

With respect to audit of Network Operations, write an essay describing each of the following categories of internal controls;

i. Physical controls,
ii. Environmental controls and
iii. Logical security controls **(15 Marks)**
